StateData OUTCOME METRICS

Partnering with states to drive change through data

Your state's data tells a story. *StateData Outcome Metrics* can help you share important data on employment outcomes and meaningful day activities from providers all across your state. Together, we promote employment systems change for people with intellectual and developmental disabilities (IDD).

Why should my state collect data?

- Monitor progress toward your goals
- Evaluate and improve actions to reach your goals
- Support data-based decision making
- Demonstrate accountability to the people you serve!

What does *StateData Outcome Metrics* do for you?

We build customizable online data collection systems

Collect the data you need to make thoughtful decisions for your state.

Our data experts and web developers build personalized data entry systems tailored to your state's goals & organizational needs to support employment and community engagement.

We build interactive data displays

Once you have the data, let it show!

Our data experts develop practical data displays for state personnel, policymakers, and researchers to browse at state, regional, and provider levels. These displays are user-friendly and engaging for people with disabilities and their families to make informed service choices.

We offer day-to-day technical support

We can be there every step of the way.

Our data experts and web developers are on call to support you in streamlining data entry, cleaning and managing data, integrating data, troubleshooting tech issues, and upgrading the website.

We provide on-demand data analysis & reporting

Your data, at your service!

We guarantee expert, on-demand data interpretation and reporting to support your state's current needs and policies as well as your decision-making and accountability.

My state already collects this data. What can you do for us?

You bring the data, we build your interactive data display!

If your state has a data collection system in place, we can help your data reach those who want to use it: state personnel, policymakers, and researchers as well as people with disabilities and their families.

MEET THE DATA EXPERTS

Jean Winsor, PhD, Data Director

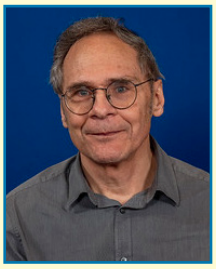
Jean has over 20 years of experience researching the policies and practices of states with high rates of integrated employment and 15 years of experience providing technical assistance to employment system stakeholders. Her work includes efforts to understand the methods states use to collect data on employment, the strategies states use to fund employment services, and the factors that impact the choices individuals with disabilities make about employment.

Agnes Zalewska, MPH, Data Expert

Agnes manages ThinkWork's state data collection projects. Over her 10+ years of experience on the project, she's played a key role in helping develop ICI's data collection systems. Agnes works directly with states on data collection and reporting, addressing specific data requests, and providing robust communications with each state and their contracted providers. Agnes also monitors the entire data collection information system and works with the team on continuous improvement of tools and processes.

John Shepard, BA, Data Expert

John supports data collection projects, working with state agencies to gather and analyze data to drive systems change and improve quality employment outcomes. With expertise in customizing data tools, assisting providers, and aligning data activities with state policy goals, John helps states build sustainable, high-quality data systems that track progress and support long-term objectives.



Paul Foos, PhD, Lead Web Developer

Paul has over a decade of experience developing and maintaining data collection systems and data display websites. Paul helps non-technical staff communicate via the internet and creates websites that are accessible to all users. Paul's background is in education and technology.
